

GAISER 2000

Cleaning and sanitizing work can be incredibly enhanced with the use of steam, which - in addition - guarantees considerable savings on the consumption of water and detergents.

GAISER 2000 is a single-phase steam generator ideal for professional use, with a robust stainless-steel body. The boiler has a capacity of 1.5 liters, which develops 6 bar of pressure thanks to a pair of heating elements of 3200 W in total. The boiler is equipped with the exclusive Non-Stop System technology, which facilitates the continuous supply of water within the same, while the Click&Go system allows to start working with the machine within a few minutes from its switching on.

Our exclusive Flow-Master technology makes it very easy to manage steam and allows to decrease or increase its flow according to real needs. Gaiser 2000, moreover, is a very safe product: our Intelli-Boiler system automatically turns off the machine in case of emergency.

STI's exclusive Steam-Booster technology, which is managed electronically, enables the mixing of a second stream of wet steam with the dry steam (particularly useful for dissolving and eliminating any residual dirt), while our Twin-Power system lets you choose to work either with only one heating element (domestic use), or both (professional use). The use of Gaiser 2000 guarantees very clean surfaces, free from bacteria and microorganisms.

Moreover, thanks to its combined dry / wet steam jet, it eliminates all traces of grease, leaving all surfaces oil-free and smooth.

TECHNICAL FEATURES

Model	GAISER 2000	Temperature Max	160 °C
Power Supply	220V-240V	Steam Production	100 g/min
Max Power	3200 W	Refill Tank	2,2 L
Boiler Power	3200 W - 2200 W	Detergent Tank	-
Boiler Capacity	1,5 L	Vacuum Power	-
Pressure	6 BAR	Body	STAINLESS STEEL
