

QV7 PRO

Cleaning and sanitizing work can be incredibly enhanced with the use of steam, which - in addition - guarantees considerable savings on the consumption of water and detergents.

QV7 PRO is a steam generator ideal for professional use, equipped with a "suction" function. This technology, called Dry-Master, allows the operator to vacuum and dry-up perfectly the surface treated with steam. In addition, the machine's exclusive Infini-Vac system offers the possibility to adjust the suction power to obtain an even better cleaning result. The boiler has a capacity of 1.5 liters, which develops 7 bar of pressure thanks to a pair of heating elements of 2400 W in total. The boiler is equipped with the exclusive Non-Stop System technology, which facilitates the continuous supply of water within the same, while the Click&Go system allows to start working with the machine within a few minutes from its switching on.

Our exclusive Flow-Master technology makes it very easy to manage steam and allows to decrease or increase its flow according to real needs. QV7 PRO, moreover, is a very safe product: our Intelli-Boiler system automatically turns off the machine in case of emergency.

Thanks to our exclusive Dose-Master technology (from 1 to 8 levels), the electronic management of the "steam/detergent" mixture allows you to mix the ideal quantity of solution with steam, thus avoiding any waste. QV7 PRO is equipped with the exclusive VAP Filter System, a technology patented by STI that duplicates the cleanliness of the intake air. In fact, in addition to the normal water filter, the machine is equipped with a steam filter that eliminates micro-dust, pollen and mites. Additionally, a special technology called Airfresh-Tech allows you to clean and perfume the air inside your home/office etc. QV7 PRO is the most complete product for the cleaning of homes / offices / small professional activities etc. Any smooth, rough, or padded surface can be treated and cleaned thoroughly.

TECHNICAL FEATURES

Model	QV7 PRO	Temperature Max	160 °C
Power Supply	220V-240V	Steam Production	100 g/min
Max Power	2400 W	Refill Tank	1,5 L
Boiler Power	2400 W	Detergent Tank	1,5 L
Boiler Capacity	1,5 L	Vacuum Power	1200 W
Pressure	7 BAR	Body	ABS
